Dear Professor Lederberg,

Our biochemical department is planning a symposium on isolation and structure of DNA from microorganisms to be performed at this institute, 4 - 8 July 1966.

In behalf of the people who organize this meeting, I would like to ask you whether you are travelling before the Moscow conference in Europe and if so, whether you can see any possibility to attend this symposium. We all would be very glad if you could come once to Jena at this occasion and as soon as we have a positive message from you, an official invitation can be mailed. Furthermore we were very grateful if you knew some other people who could be interested in our symposium.

With best wishes for 1966

Sincerely yours,

Udo Taubeneck
